▲ **GREAT FAKE**

Many homeowners are inspired to help the environment and lawn care is one area that is of particular interest. Artificial Grass and Landscaping (AGL) has taken environmental awareness to a whole new level. The company has developed artificial grass for residential use so you'll never have to water or mow your lawn again.

Artificial grass looks healthy and vibrant even in the most blistering summer heat waves. Time and energy will no longer be spent mowing, weeding, fertilizing and doing other maintenance tasks, not to mention the money you'll save because you no longer require a lawn mower. Artificial grass is resistant to salt damage, animal waste, rain and snow. Best of all, it is non-toxic and safe for the environment, pets and children.

AGL takes care of your project from start to finish. After your soil has been prepared and the area has been graded for proper drainage, the artificial grass is rolled out and topped with small rubber granules. An 8-year warranty on both the product and service is included.

Homeowners can see all AGI's landscaping possibilities and other new products at their sales centre opening in April at 1040 South Service Road in Stoney Creek. Call 905.643.5000.
