## He has the greenest lawn in Timmins

### New artificial grass eliminates weed worries

Timmins businessman Andre Giroux has the greenest "grass" in Timmins. Giroux installed artificial turf last fall.

That has to be the greenest lawn in town. And with the new law banning herbicides and weed killers in Ontario, Timmins businessman Andre Giroux is confident his artificial grass lawn will be weed free all summer. Giroux, who lives on Blahey Court, installed his new lawn last summer and was pleased this week, when the snow melted, to see the material was as green as ever. Giroux was out this week using a power brush to sweep the lawn and clean up any winter debris. Giroux is a partner in AGL Grass North, a new Timmins business that hopes to take advantage of the new provincial laws that bans chemical weed killers. The new law came into effect on Earth Day, April 22.
